Advisory Action Before the Filing of an Appeal Brief

Application No.		Applicant(s)	
	10/718,129	FIGUEIRA ET AL.	
	Examiner	Art Unit	

-						
	Chandrahas Patel	2616				
The MAILING DATE of this communication appe	ears on the cover sheet with the o	correspondence add	ress			
THE REPLY FILED <u>01 May 2008</u> FAILS TO PLACE THIS APP	LICATION IN CONDITION FOR AL	LOWANCE.				
☑ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time						
periods: a) The period for reply expires <u>3</u> months from the mailing date	of the final rejection					
 The period for reply expires 5 months from the mailing date of the final rejection. The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. 						
Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TW MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).						
Extensions of time may be obtained under 37 CFR 1.136(a). The date have been filed is the date for purposes of determining the period of ex under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the set forth in (b) above, if checked. Any reply received by the Office later may reduce any earned patent term adjustment. See 37 CFR 1.704(b)	tension and the corresponding amount shortened statutory period for reply origi than three months after the mailing dat	of the fee. Continuation of 7. NOTE: Applicant's arguments filed 5/1/2008 have been fully considered but they are not persuasive. Applicant argues that Schaub does not teach " making a switching decision within the first switch based on the extracted frame cotained destination information without performing a lookup in a forwarding table to determine an output port from the first switch over which the frame should be forwarde.,d onto the communicalion network". However, examiner disagrees. Schaub teaches extracting fields by parsing the fields from packets and based on the fields of a header. Frames are forwarded without doing a table lookup since the output scheduling is done in a round-robin manner either packet by packet or by groups of packets and output port is selected in this manner without doing any table lookup. Applicant argues that Schaub does not teach "each of the fields containing a code to be used by a switch on a network to identify an output port on the switch without performing a table lookup". However, examiner disagrees. Schaub teaches parsing the header of the packet and than determines the output port selection based on the results of mapping. If the category is round-robin as taught by Schaub no lookup is done to identify the output port. Applicant argues that Pearce does not teach "assigning a first value to a first field of the MAC address, the first field, containing a smaller number of bits than a total number of bits of the destination MAC address, the first value containing first output interface information usable by a first switch to identify a first output interface for transmission of frames containing the first value in the first field of the MAC address". However, examiner disagrees. ARP table in Fig. 10 teaches addressing the ports and assigning MAC addresses to ports. This assignment is used to identify the output ports that will be used with a given MAC address.

Applicant argues that protocol data unit data structure stored in a tangible computer readable medium is statutory. However, examiner disagrees. MPEP clearly states data structure per se in non-statutory [MPEP 2106.01]. Further, applicant argues that the data structure contains code to be used a switch on a network to identify an output port on the switch. However, a data structure is being claimed. Data structure can be used to identify a port. However, the data structure itself cannot produce any useful result. A data structure on a computer redable medium cannot cause the functionality to occur until a software or hardware makes use of such data structure. Therefore, a data structure is an abstract idea and is unable to cause any change in the functionality of the device which makes the claim non-statutory.
